

## The FC4100 Series Precision, Performance and Power

You need precision, performance and power, all in one machine! Too much to ask for? Not when you're asking it from Graphtec. You want a sign cutting machine that's simple to use, accurate, reliable, durable, versatile, smooth and fast. With these demands we created our FC4100 Series, a full line of Cutters including the 30" FC4100-75, 40" FC4100-100 and 54" FC4100-130, all with a 50" per second maximum speed and each designed to give you the dependability you've been searching for. When it comes to finding a partner for success in the sign making world need to look no further than Graphtec. The Graphtec FC4100 Series, the best value on the market for quality equipment that is meant to last forever.

### Features:

- User Friendly Control Panel - comprehensive operation and quick selection of multi-job settings.
- LED Positioning - tool-free registration & proof tracing
- Enhanced Accuload - with optional media rack for productivity and convenience.
- SmartFeed - automatically pre-feeds for unattended repeat jobs and long length runs.
- Tangential Emulation - accurate & quality cutting of thick material.
